SUMMARY

I am an aspiring Software Engineer with hands-on experience in web and mobile development using HTML, CSS, JavaScript, React, Node.js, and Flutter. I am skilled in version control with Git and UI/UX design using Figma. I bring a strong problem-solving mindset, along with excellent teamwork, communication, and public speaking skills. I am passionate about learning new technologies and collaborating with others to build practical, user-centered applications.

WORK EXPERIENCE

Software Developer Coach

Jan 2026 - Present

- Train and mentor Kepler College students in software development, mainly focusing on JavaScript, TypeScript, HTML, CSS, React, and Node.js.
- Guide students in building practical projects while teaching clean coding practices and problem-solving skills.
- Support students in strengthening their core programming concepts, independent learning, and teamwork abilities.

The Gym | Kigali, Rwanda Software Developer Trainee

Nov 2024 - Dec 2025

- Developed responsive frontend applications utilizing React, JavaScript, HTML, CSS, and Tailwind CSS.
- Built and integrated backend services and APIs using Node.js, Express.js, and NestJS.
- Collaborated closely within teams to build software projects, actively contributing to team problem-solving and code integration.
- Created user interface designs using Figma.
- Participated in structured technical debates and presentations to strengthen public speaking and professional communication skills.

SheCodes Bootcamp | Online Bootcamp Web Developer Trainee

Aug 2024 - Oct 2025

- Developed interactive web applications utilizing HTML, CSS, JavaScript, and AJAX.
- Built and deployed various mini-projects, actively applying debugging and problem-solving techniques to resolve code issues.
- Successfully managed project timelines and consistently met development deadlines within a self-paced, remote environment.

SheNovate Mentorship Program | Kigali, Rwanda SheNovate Mentee

Aug 2024 - Oct 2024

- Actively engaged in a mentorship program focused on empowering women in STEM and building professional skills in technology.
 - Developed career strategies, problem-solving abilities, and confidence by working closely with experienced industry mentors.
 - Explored different technical career paths to plan for long-term growth as a software engineer.
-

EDUCATION

African Leadership University | Kigali, Bumbogo

- **Coursework:** Linux and IT Tools, Python Programming, Databases, Front-end Web Development, Web Infrastructure, Data Structures and Algorithms, Software Engineering Principles, JavaScript Programming.
- **Specialization in Machine Learning:** Mathematics for Machine Learning, Supervised Learning, Unsupervised Learning.

King David Academy | Kigali, Kanombe

- High School Diploma
 - Mathematics, Physics and Computer Science
-

PROJECTS

HerHorizon – Full-Stack Web Platform

React, Node.js, MongoDB, REST APIs

- Designed and developed a full-stack web platform aimed at empowering young women through curated opportunities in education, skills development, mentorship, and career growth.
- Built a clean, responsive user interface to ensure accessibility and ease of use.
- Developed an admin dashboard for managing and updating platform content.
- Implemented RESTful APIs for secure data handling and content management.
- [Github Link](#)

Car Sharing Platform (Team Project)

React, NestJS, PostgreSQL, Git

- Collaborated in a team to build a car-sharing web application during intensive training.
- Developed frontend components using React for booking and vehicle listing features.
- Contributed to backend API development using NestJS.
- Worked with version control (Git) in a collaborative development environment.
- [Github Link](#)

Study Planner Mobile App

Flutter, Dart

- Developed a mobile study planner application using Flutter.
- Implemented task scheduling, reminders, and progress tracking features.
- Designed an intuitive user interface to help students manage academic activities effectively.
- Applied state management principles for efficient data handling.
- [Github Link](#)

RescuePlate

React, NestJS, MongoDB, Git

- Developed a full-stack web application using React and NestJS to help reduce restaurant food waste.
 - Built a platform that allows restaurants to list and sell their leftover, unsold food instead of throwing it away.
 - Designed a system to categorize the surplus food for different uses, including both human consumption and animal feed.
 - Created a responsive user interface with React for buyers to easily browse available food, supported by a secure NestJS backend to manage restaurant listings.

-

TECHNICAL SKILLS

- Languages & Frameworks: HTML, CSS, JavaScript, React, Node.js, Express.js, NestJS, Flutter (Mobile Development), Tailwind CSS, AJAX.
 - Tools & Platforms: Git (Version Control), GitHub, Figma (Basic UI/UX).
-

SOFT SKILLS

- Communication & Public Speaking
 - Teamwork & Collaboration
 - Time Management
 - Mentoring & Coaching
-

LANGUAGES

- English: Proficient (C2)
 - French: Beginner (A1)
 - Kinyarwanda: Native Language
-

VOLUNTEERING & LEADERSHIP

The Gym Preparatory Training Coach | Apr 2025 – Nov 2025

Volunteered to teach high school graduates basic web development skills (HTML, CSS, JavaScript), helping them build confidence in technology.

University Matriculation Volunteer | Aug 2025

Assisted international students with registration for their new trimester, providing guidance to ensure a smooth onboarding process.
